

Technical data for frame 4 - row

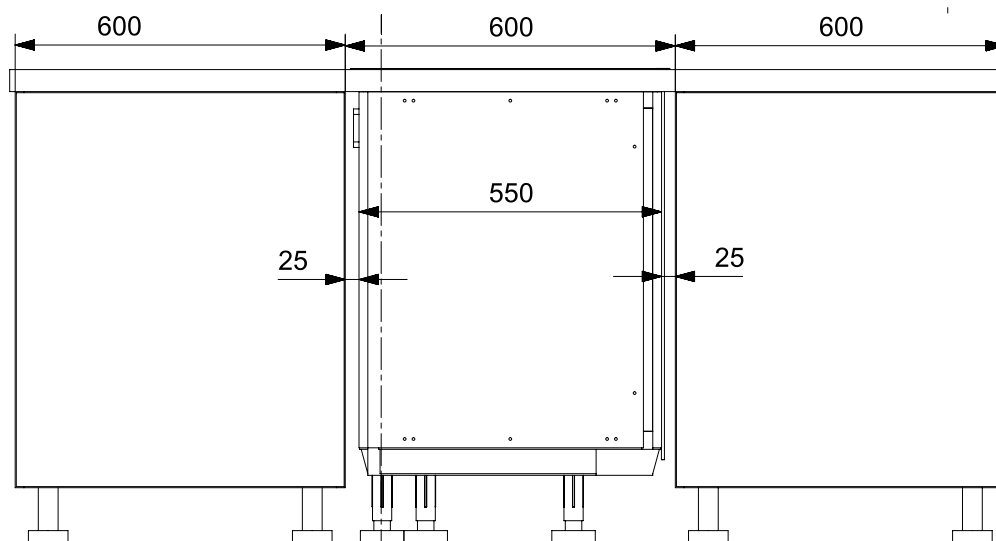

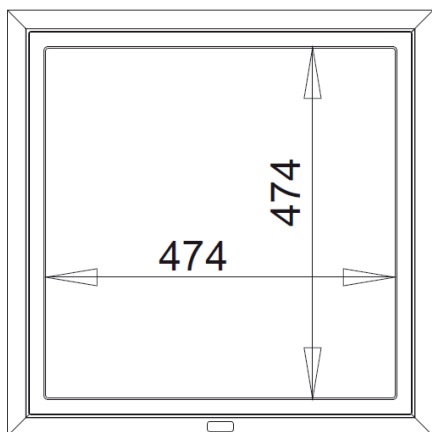

For installation with a cut-out in the worktop.

The upper plastic shelf is visible.

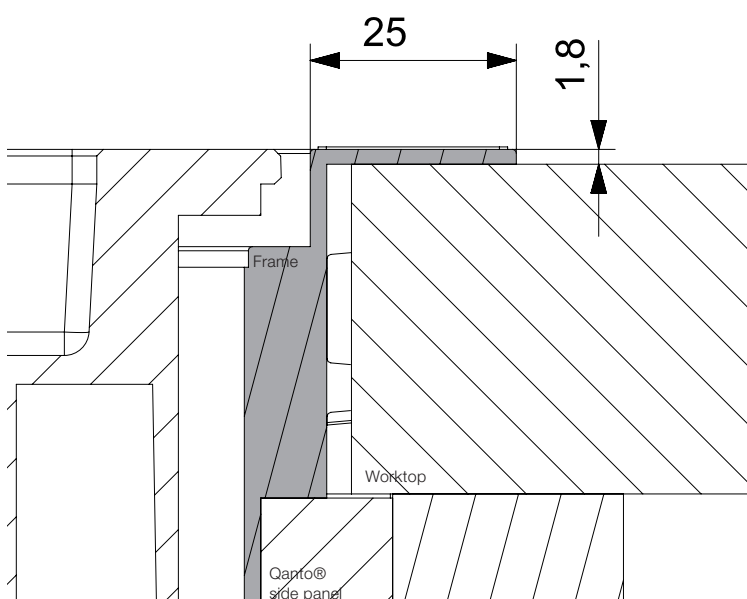

- Planning measure 700 x 650mm
- Worktop depth $\geq$ 650mm
- Outer frame dimension 580mm
- Extension distance 496mm - when extended, keep a distance of at least 200mm in all directions from other cabinets!
- Shelf load: top max. 10kg, bottom max. 15kg
- Can also be used in handleless kitchens
- At the end of the line: Place Qanto in 60 cm carcass, attach plinth to feet of carcass.
- **Tip!** In the row: use 2 x 25mm chipboard panels for screwing to the neighbouring carcasses, results in Standard dimension 600mm. Use standard 60 mm front.
- **Attention!** As the Qanto is positioned directly against the wall, the thickness of the niche panel should be taken into account when planning!
